

flustix ATTESTATION OF PLASTIC-FREENESS AND RESIDUAL POLYMER CONTENTS

License Holder:

LECTA Group
Llull, 331
08019 Barcelona, SPAIN

The following products of the certificate holder have been approved by an accredited test laboratory for their polymer content based on Certification Scheme flustix LESS PLASTICS (Edition: February 2025):

flustix Certification License Number	Product Trade Name	Size(s) / Format(s)	Lab Report No.	Detected Polymer Contents ^{1), 2)}	Size(s) passed (certified)
FPPI005	ERACUP NATURAL	275 gsm 315 gsm	25KA0152-04	<0.51% <0.56%	275 gsm 315 gsm

¹⁾ In Mass Weight Percentage (confirmed by laboratory analysis). ²⁾ Detected synthetic or chemically modified polymer contents, not originating from a naturally occurring polymerisation process, as defined in the flustix LESS PLASTICS Certification Scheme.

This attestation **applies only to the Licensee.**

With this attestation, flustix confirms that the above-mentioned products comply with the stated maximum residual polymer content thresholds as specified in the flustix LESS PLASTICS Certification Scheme (Edition: February 2025). This conformity has been verified through testing by an accredited laboratory and conformity assessment by an accredited certification body. All tested products have been awarded theseal of the highest product threshold category, **flustix LESS PLASTICS | PRODUCT – MIN. 99.25% PLASTIC-FREE**, and are officially certified accordingly.

Certified products can be viewed at any time in the flustix [Database](#). The validity of this document is tied to the validity of the official certificates issued by the respective accredited certification bodies, bearing the identical listed license numbers.

***Note: This attestation is valid exclusively in conjunction with the corresponding 1. database entry at flustix.com/certified and 2. the valid flustix certificate for submission to competent authorities, stakeholders and business partners.**
